# OUR ETHOS

---

The Spartan Product range came about from the inventor's passion for hunting and climbing in remote and mountainous parts of the world. Since our conception, Spartans product range has grown beyond meeting the Backcountry hunters needs and now provides products for all shooting applications, from mountain hunters, woodland hunters, professional guides, long-range target shooters, law enforcement, military personnel, and many Special forces units around the World.

Our products may have changed but our ethos has remained embedded in our Spartan DNA. Design it right, use the best materials and listen to others!

Read the reviews and invest in the best.

Patent Pending

# RIFLE ADAPTERS

## PICATINNY TAC ADAPTER

For direct attachment to M1913 Mil-Std Picatinny accessory rails.

## M-LOK TAC ADAPTER

For direct attachment to genuine M-LOK accessory rails.

## KEY MOD TAC ADAPTER

For direct attachment to genuine Key Mod accessory rails.

## CLASSIC PICATINNY ADAPTER

For direct attachment to M1913 Mil-Std Picatinny accessory rails.

## CLASSIC M-LOK ADAPTER

For direct attachment to genuine M-LOK accessory rails.

## CLASSIC KEY MOD ADAPTER

For direct attachment to genuine Key Mod accessory rails.

## CLASSIC UIT RAIL ADAPTER

For direct attachment to genuine UIT (Anschutz) accessory rails.

## ARCA SWISS ADAPTER

For direct attachment to genuine Arca Swiss accessory rails.

## VALHALLA PICATINNY ADAPTER

Enables our Valhalla Bipod to be attached rifles with M1913 Mil-Std Picatinny accessory rails.

## VALHALLA M-LOK ADAPTER

Enables our Valhalla Bipod to be attached rifles with M-LOK accessory rails.

# JAVELIN® BIPOD

The 'Javelin Pro Hunt Tac' is a strong but lightweight bipod that has a high-quality CNC machined body and our unique, patented 'Magnetic Attachment System' that enables the bipod to be carried separately in a holster, pocket or backpack and instantly attached to the rifle when you need it to make a shot.

Where weight, reliability, functionality & capability are primary concerns the 'Javelin Pro Hunt Tac' lightens the operational load, making the rifle more comfortable to carry, reducing hooking ups on foliage & equipment. Removing the bipod from the rifle until needed keeps it balanced & the stock uncluttered for shooting free-handed or off other rests & supported positions.

# JAVELIN® PRO HUNT TAC

- + Spring loaded interchangeable Tac Legs
- + Leg Lock-Out button to open and close legs
- + Track targets with the pan function
- + Locking cant facility for uneven terrain
- + Rubber and tungsten carbide feet
- + Secure sling attachment
- + Easy to swap to other rifles
- + Low profile adapter makes carrying a slung rifle comfortable
- + Direct adapter attachment capability to Spartan tripod fittings

# VIDARR BIPOD

---

The Vidarr is a CNC machined, lightweight tactical bipod, with an innovative design that allows users to take full advantage of the high-performance calibres used in modern compact short-barrelled rifles & carbines. It provides greater stability & accuracy where accurate shot placement is critical or the operational range needs to be extended.

The slim design matches our patented magnetic attachment system with our rail specific 'Tac-Adapter' range, enabling rapid attached or detached from the rifle when required. The 'Vidarr' can also be folded up under the rail for fast-moving deployments, making it ideal for users working in confined spaces, buildings, vehicles or where the risk of entanglement is a consideration.

# VIDARR BIPOD

- + Spring-loaded, incrementally adjustable legs
- + Rapid attachment & detachment to a rifle
- + Can be folded up & locked under the rail
- + Track targets with the traverse capability
- + Cant capability for levelling the rifle on uneven terrain
- + Serviceable feet covering rubber boots over tungsten carbide tips
- + Low profile & compact for carriage when removed
- + 'Tac-Adapter' rail mount options for 'Picatinny', 'M-Lok' & 'Key-Mod'
- + Direct adapter attachment capability to Spartan tripod fittings

ARCA SWISS ADAPTER	

# VALHALLA® BIPOD

The Valhalla bipod uses a CNC machined chassis design that lowers the centre of gravity and provides a wide & stable leg stance that enhances accuracy, that can also be over barrel mounted. A locking cant function provides for shooting on uneven terrain. The rifle attached spigot fitting moves the fulcrum point towards the muzzle, increasing stability, whilst enabling the bipod to be easily attached & detached from the rifle.

The two sectioned 'Tac Legs' are spring-loaded and incrementally adjustable for height and can be changed out to allow easy fitting of the Spartan 'Pro-Legs', which are offered in a selection of different lengths. The legs can be independently set to five different pitch positions, forwards or rearwards for use around obstacles, obstructions or structures. The 'Valhalla' bipod enables direct connection to the 'Sentinel', 'Ascent' & 'Hercules' tripod systems & our 'Davros' tripod converter head, facilitating rapid adaptation of shooting stances.

# VALHALLA® BIPOD

- + Wide and stable leg stance
- + Low centre of gravity
- + Spring-loaded - incrementally adjustable legs
- + Rapid attachment & detachment to a rifle
- + Leg pitch adjustable to five angle settings
- + Locking cant capability for levelling the rifle on uneven terrain
- + Serviceable feet covering rubber boots over tungsten carbide tips
- + Rail mount options for 'Picatinny' & 'M-Lok'
- + Direct bipod attachment capability onto Spartan tripod fittings

ARCA SWISS ADAPTER	

# SENTINEL™ TRIPOD

The Spartan 'Sentinel' is a minimalist and robust support system for rifles & optics that is highly adaptable in the field. Using our patented 'Magnetic Attachment System', to rapidly attach or detach rifles or other equipment when required. One system allowing transition from reconnaissance & evidence-gathering operations to intervention.

Its CNC machined head unit features an articulating spigot mount with a large range movement for high angle shooting and use on uneven terrain. The strong but lightweight three-section carbon fibre legs are removable from the head unit allowing the user to adapt the 'Sentinel' as a tripod, bipod or monopod, & trekking poles, and even form a support frame for a lightweight shelter system.

# SENTINEL™ TRIPOD

- + Multifunctional tripod, bipod monopod/trekking pole & shelter support system
- + Rapid transition between rifles, optics, cameras & accessory equipment
- + Smooth and stable 360-degree traverse
- + Friction controlled elevation, depression and cant adjustment
- + Detachable legs for use as trekking poles
- + Folding hook to mount extra ballast weight to aid stability
- + Serviceable feet, covering rubber boots over tungsten carbide tips

# ASCENT™ TRIPOD

---

The Spartan 'Ascent' is a fully-featured & versatile support system for rifle, optics and cameras, that can be rapidly adapted for specific operational or environmental conditions. Using our patented 'Magnetic Attachment System', to rapidly attach or detach rifles, other equipment when required. In one system, the 'Ascent' is the ideal platform for unpredictable deployments that may require both intelligence gathering and direct action capabilities.

Capable of being specified with our durable CNC machined 7075 aluminium Spartan 'Davros' or 'Pro Davros' heads, the 'Ascent' features a quick adjustable central column - optics tool kit, that can be raised or lowered for use with optics & cameras. The leg pitch features four settings that allow the user to easily lower the head unit, for seated & prone stances. The four-section multi-layered carbon fibre leg units are compact for carriage and allow the 'Ascent' to be used as a tripod, bipod & monopod & trekking poles.

# ASCENT™ TRIPOD

- + Multifunctional tripod, bipod, monopod & trekking pole system
- + Rapid transition between rifles, optics, cameras & accessories
- + Stubby central column for quick optic & camera height adjustment
- + Four leg pitch positions from standing to prone
- + Four-section detachable carbon fibre legs for use as trekking poles
- + Smooth and stable 360-degree traverse
- + Friction controlled elevation and depression and cant adjustments
- + Serviceable feet - covering rubber boots over tungsten carbide tips
- + Compatible with third-party pan head that has a 3/8" female thread
- + Folding hook to mount extra ballast weight to aid stability
- + Compatible with alternative accessory leg lengths
- + Optional central column height extender

# ASCENT™ MINI TRIPOD

The Spartan 'Ascent Mini' offers the same quality & versatility as the full sized 'Ascent' system, but in a compact & adaptable package. The 'Ascent' is well suited for use as a sturdy, compact and stable support system for, optics, cameras, and ancillary equipment. Our magnetic attachment system ensures that the attached equipment can be quickly and accurately positioned.

Like its full-sized version the 'Ascent Mini' can also be specified with our Spartan 'Davros' or 'Pro Davros' heads, depending on the user requirements, and features the spring-loaded, incrementally adjustable 'Tac Legs' for accurate height setting. Each leg has four leg pitch settings and a stubby central column, soft adjustments can be made for height & angle.

# ASCENT™ MINI TRIPOD

- + Stable & sturdy with a high load rating
- + Rapid transition between rifles, optics, cameras & accessories
- + Stubby central column for quick optic & camera height adjustment
- + Four pitch - adjustable leg positions for rapid levelling
- + Spring-loaded, incrementally adjustable legs
- + Smooth and stable 360-degree traverse
- + Friction controlled elevation and depression and cant adjustments
- + Serviceable feet - covering rubber boots over tungsten carbide tips
- + Folding hook to mount extra ballast weight to aid stability
- + Compatible with alternative accessory leg lengths
- + Optional central column extension tube

# HERCULES TRIPOD

The Hercules tripod is a high capacity modular tripod system specifically developed as a support for large rifle platforms where maximum accuracy is required in the most demanding situations. It is also capable of mounting cameras, optical equipment and other accessories. The durable head unit is CNC machined from a solid billet of 7075 aluminium which provides four variable locking leg pitch angles. High-quality carbon fibre legs units are formed from four sections and use a reliable twist locking system that can create a full-height tripod. The 'Hercules' can also be adjusted to fit a variety of shooting stances from standing to prone.

The innovative modular design allows the 'Hercules' to be easily assembled as a tripod, bipod or monopod or disassembled into its component parts for travel or discreet carriage. The 'Hercules' features the patented 'Spartan' Magnetic Attachment System for rapid attachment of rifles, cameras or optical equipment. The innovative modular head design enables it to be rapidly adapted to accept most industry-standard 'Arca -Swiss', camera or video ball heads. Alternatively, it can be fitted with the Spartan 'Davros Pro' head unit or 'Arca-Swiss' adapters.

# HERCULES TRIPOD

- + Robust, sturdy with a high load rating
- + Multifunctional tripod, bipod, monopod & trekking pole system
- + Rapid change module design, rifle, optic, cameras & accessories
- + Four pitch leg positions from standing to prone
- + Four-section detachable carbon fibre legs for use as trekking poles
- + Smooth and stable 360-degree traverse
- + Friction controlled elevation and depression and cant adjustments
- + Serviceable feet - covering rubber boots over tungsten carbide tips
- + Compatible with third-party 3/8" ball heads
- + Folding hook to mount extra ballast weight to aid stability
- + Compatible with alternative accessory leg lengths
- + Optional central column extension tube

# DAVROS™

---

The Spartan 'Davros' is a versatile and compact head unit that allows users to easily convert other commercial tripods & support systems into highly stable rifle & optics platforms. Using our 'Magnetic Attachment System' it is directly compatible with a wide selection of Spartan rifle & optics adapters, that significantly improves stability and support, whilst helping to increase accuracy.

The 'Davros' is CNC Machined from billet 7075 aluminium, the head unit threads directly onto any optics industry-standard 3/8"-16 & 1/4"-20 male threads. This enables it to be easily transferred between multiple shooting supports. The 'Davros' will also attach to a wide range of third party tripods & supports, and is directly compatible with the Spartan 'Mr G Clamp', 'Spartan Sucker' & 'Mag Mount' the Spartan 'Pan Head Converter'.

# DAVROS™

- + Robust & easy maintained design
- + Durable hard anodised corrosion-resistant finish
- + Enhanced stability using the 'Magnetic Attachment System'
- + Reliable & simple fitting onto other third party supports
- + Compatible with industry-standard 1/4"-20 & 3/8"-16 thread sizes
- + Compatible with a wide range of Spartan rifle & optics adapters
- + Easy equipment transfer between rifle, optics & accessories
- + Smooth and stable 360-degree traverse
- + Friction controlled elevation and depression and cant adjustments

ATTACHMENT

# DAVROS™ PRO

The Spartan 'Pro Davros' builds upon the versatility of the original 'Davros' design by adding a range of movement up to 90°, friction control levers and an enlarged spigot ball joint, that is capable of controlling greater loads. The 'Pro Davros' allows users to easily convert other commercial tripods & support systems into highly stable rifle & optics platforms. Using our 'Magnetic Attachment System' and is directly compatible with a wide selection of Spartan rifle & optics adapters, that significantly improves stability and support & whilst helping to increase accuracy. A non-magnetic spigot is supplied as an option for use with sensitive electronic equipment.

The 'Pro Davros' is CNC Machined from billet 7075 aluminium, the head unit directly threads onto optics industry-standard 3/8"-16 & 1/4"-20 male threads. This enables it to be easily transferred between multiple shooting supports. The 'Pro Davros' will also attach to a wide range of third party tripods & supports, and is directly compatible with the Spartan 'Mr G-Clamp', 'Spartan Sucker' & 'Mag Mount'.

# DAVROS™ PRO

- + Durable hard anodised corrosion-resistant finish
- + Enhanced stability using the Magnetic Attachment System
- + Reliable & simple fitting third party support
- + Compatible with industry-standard 1/4"-20 & 3/8"-16 thread sizes
- + Compatible with a wide range of Spartan rifle & optics adapters
- + Easy equipment transfer between rifle, optics & accessories
- + Smooth and stable 360-degree traverse
- + Friction controlled elevation, depression and cant adjustments
- + Non Magnetic spigot option supplied for use with sensitive electrical equipment

# ACCESSORIES

# SUCKER MOUNT

---

The 'Sucker Mount' is an accessory for users that need to use a temporary mounting solution for the 'Davros' & 'Pro Davros' or the 'Articulating Arm' and other commercially available ball heads. The sucker uses a simple plunger operated pump to create a partial vacuum onto any smooth surface, including glass. The body is fitted with a 3/8"-20 male thread that facilitates direct attachment of the 'Davros' range of products and other ball heads with a suitable female thread. The powerful sucker function provides a firm but compliant mounting platform for shooting, observing or photography.

# MR G CLAMP

---

The 'Mr G Clamp' is an accessory for users that need to use a temporary mounting solution for the 'Davros' & 'Pro Davros' and other commercially available ball heads. The simple clamping design enables optics, cameras or other accessories to be quickly mounted onto flat & curved surfaces up to 60mm / 2.3", the clamp has five separate male 1/4"- 20 industry-standard mounting positions around the frame. A 3/8"-16 'step-up' bushing is supplied to accommodate the thread large fitting size.

## MAG MOUNT

---

The 'Mag Mount' is an accessory for users that need to use a temporary mounting solution for the 'Davros' & 'Pro Davros' and other commercially available ball heads. The powerful & compact switched magnet is fitted with a 3/8"-16 male thread that enables optics, cameras or other accessories to be quickly & quietly mounted onto flat & curved ferrous surfaces.

## PAN HEAD CONVERTER

---

The 'Panhead Converter' is an accessory option for use with the 'Davros' head & 'Sentinel' & 'Ascent' tripods, that enables any photographic ball head where additional stability & finesse is required. It can be directly mounted & locked onto the top-ring without tools. The design facilitates the rapid transition between the use of a camera & optical equipment to of a rifle.

The 'Panhead Converter' is CNC machined in 7000 series aluminium and has a 1/4" - 20 male screw thread & 3/8" - 16 bushing for larger threads.

# LIGHT DUTY OPTICS ADAPTER

---

This CNC machined adapter is instantly attached to the 'Davros' range of products, 'Sentinel', 'Ascent' & 'Hercules' tripods using our patented 'Magnetic Attachment System'. Intended for use with lightweight cameras, optics & accessories, enabling rapid mounting stabilisation and dismounting. The adapter is fitted with a 1/4" - 20 industry-standard male screw that facilitates fitting to any compatible thread.

# HEAVY DUTY OPTICS ADAPTER

---

This CNC machined adapter is instantly attached to the 'Davros' range of products, 'Sentinel', 'Ascent' & 'Hercules' tripods using our patented 'Magnetic Attachment System'. Intended for use with full SLR cameras, videography equipment, optics & accessories, enabling rapid mounting stabilisation and dismounting. The adapter is fitted with a 1/4" - 20 industry-standard male screw that facilitates fitting to any compatible thread and uses a small gate clamp to ensure solid fitting. Comes with a removable control arm for fine adjustments.

## SENTINEL LEG

---

The individual Sentinel leg provides a very strong and robust trekking pole. Using three sections of high-quality lightweight carbon fibre tubing, that nest to gather. This matched to CNC machined aluminium joints which are specifically designed to provide a significant increase in the strength at each joint. Each leg features a rubber boot that covers a replaceable tungsten carbide tip. The top of the leg has a comfortable foam handle and can accept the optional trekking pole handle, ski basket & snow spike to form ski poles.

Using the Sentinel leg as a trekking pole when covering uneven terrain helps reduce the impact on your lower body joints especially when descending or whilst carrying heavier loads. It helps to provide an additional point of contact, which improves your stability and can be adapted for use as impromptu bivouac support.

## ASCENT LEG

---

The individual Ascent leg provides a strong and robust trekking pole. Using four compact nesting sections of high-quality lightweight carbon fibre tubing matched with quick adjusting CNC machined locking joints.

Each leg features a rubber boot that covers a replaceable tungsten carbide tip. The top of the leg has a comfortable foam handle and can accept the optional trekking pole handle, ski basket & snow spike to form ski poles.

Using the Ascent leg as a trekking pole when covering uneven terrain helps reduce the impact on your lower body joints especially when descending or whilst carrying heavier loads. It helps to provide an additional point of contact, which improves your stability and can be adapted for use as impromptu bivouac support.

# HERCULES LEG

---

The individual Hercules leg provides a strong and robust trekking pole. Using four compact nesting sections of high-quality lightweight carbon fibre tubing matched with quick adjusting CNC machined locking joints.

Each leg features a rubber foot which can be replaced with a steel spike for extra stability. The top of the leg has a comfortable foam handle and can accept the optional trekking pole handle.

Using the Ascent leg as a trekking pole when covering uneven terrain helps reduce the impact on your lower body joints especially when descending or whilst carrying heavier loads. It helps to provide an additional point of contact, which improves your stability and can be adapted for use as impromptu bivouac support.

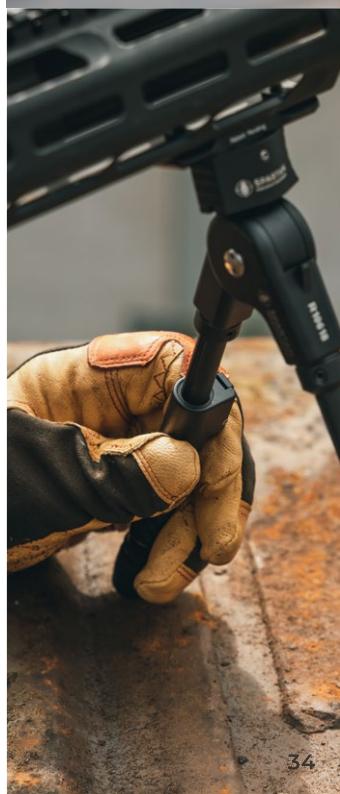

# TAC LEG

---

'Tac Legs' are used on many Spartan products and are modular in their design, enabling them to be fitted & removed or exchanged with other legs in our product range. These are especially valuable for adapting our full height systems to form smaller support systems with a lower working height.

Featuring a threaded leg top with a two-part CNC machined upper leg & carbon fibre lower leg with a rubber boot that covers a replaceable tungsten carbide tip. Each leg is spring-loaded and can be rapidly and incrementally adjusted to the required height.

## TREKKING POLE HANDLE

---

Our trekking pole handles attach quickly and easily to the leg tops of the 'Sentinel', 'Ascent' & 'Hercules' tripod legs. The handles are ergonomically shaped for comfort and have the added security of adjustable padded wrist straps.

## QUICK SHOT ADAPTER

---

The 'Quick-Shot Rest' is an accessory for use with the 'Davros' range & 'Sentinel', 'Ascent' & 'Hercules' tripods. It has been designed to fit either over the magnetic spigot or threads directly onto the top of an individual tripod leg. The rubberised support arms offer a solution where a simple shooting monopod is required or for use with a rifle that doesn't have a suitable Spartan adapter installed.

## MULTI TOOL

---

The 'Spartan Multi-Tool' is a small tool kit suitable for use with optical & camera equipment. The compact kit contains 10 x 5/32" hardened steel hex shank bits: 1 x PH2 Philips - 1 x 0.6 Flathead and 1mm, 1.5mm, 2mm, 2.5mm, 3mm, 4mm, 5mm, 6mm Hex bits. These are held in a retaining sleeve within the main body.

The 'Spartan Multi Tool' features a 3/8"-16 male thread at the bit drive end of the body and a 3/8"-16 female thread in its base, which allows it to be used with other Spartan accessories, including as a handle for the 'Heavy Optics Adapter' control rod.

# SNOW BASKETS

---

The Snow Baskets are designed to be slipped on to the lower foot of the Sentinel & Ascent tripods to spread the load where the ground is covered in snow or other soft ground conditions are encountered.

# CARBON EXTENSION TUBE

---

The 'Carbon Extension Tube' is an accessory for users of the 'Ascent' tripod system, that offers them an easy method of increasing the overall height limits of the central column for quick height adjustments'. This is especially useful for users that are using the system for photographic & videography purposes.

It is threaded at both ends to join directly onto the central column of the 'Ascent' tripod, whilst allowing its stored multitool to be relocated within the base of the tube.

# FOOT SPIKES

---

Our Foot Spikes are designed to thread directly into the lower foot of the Sentinel & Ascent tripods as an alternative to the standard tungsten tipped foot. They can be used with or without the Snow Basket and are designed to be embedded into soft ground to assist with firmly anchoring the tripods during high winds. The longer length also offers an effective option for individual tripod legs being used as ski poles.

# RIFLE REAR SUPPORT KIT

---

The 'Rifle Rear Support Kit' is an add on unit for the 'Sentinel' tripod that effectively turns it into a lightweight 4-5 legged support bench. The 'Rifle Rear Support Kit' was designed specifically for users that required an ultra-stable support platform for planned operations, that would provide the extra stability for longer range accuracy, where the environmental conditions do not allow for prone shooting stances.

The flexibility of the 'Rifle Rear Support Kit' allows it to be added or removed from the 'Sentinel' tripod in the field without tools. The design still allows the 'Sentinel' to be used as a tripod for use with optics and other equipment. In both '4' or '5' leg configurations, the curved rear cradle unit is designed to support the butt of the rifle. Its curved design provides 65 meters left & right traverse at 100meters, increasing proportionally at greater distances.
